

Loop Report (08/15/2022)

All loops were called using SIP with the following parameters (example given is a merged .hic file for all control replicates (3) and with `-isDroso true`):

```
java -jar /proj/phanstiel_lab/Software/SIP/SIP_HiCv1.6.2.jar  
  
hic /proj/phanstiel_lab/Data/processed/YAPP/hic/hg38/220716_dietJuicerMerge_condition/outp  
  
/proj/phanstiel_lab/References/chromSizes/hg38_chromSizes.txt  
  
/proj/phanstiel_lab/Data/processed/YAPP/hic/hg38/220719_sip-loops/isDroso/cont  
  
/proj/phanstiel_lab/Software/juicer/scripts/juicer_tools.jar  
  
-norm SCALE -g 1.0 -min 2.0 -max 2.0 -mat 2000 -d 6 -res 5000 -sat 0.01 -t 2000 -nbZero 6
```

Load libraries

```

i Note

This report was created because we mentioned that these loop numbers were pretty high.
